

COMPANY PROFILE 2026

Engineering. Fabrication. Installation.

Metal solutions for marine and international industrial projects.

COMPANY

ALEX RO INVEST SRL

Romanian engineering, metal fabrication and installation company founded in 2021.

2021

Founded

~100

Operational workforce

2,000 m2

Current production

+500 m2

Expansion

- **Integrated delivery**

Engineering, in-house production, finishing, logistics coordination and installation within one project workflow.

- **Marine experience**

Cruise-ship passenger areas, exterior systems, pool and wellness, hospitality and custom metal solutions.

- **Materials**

Stainless steel 304/316, carbon steel and aluminium, with glass integration through collaborators.

- **International execution**

Project activity in France, Italy, Finland, Norway, Germany, Romania and the United States.

CAPABILITIES

Complete fabrication workflow

From drawings and raw material to finished assemblies and on-board installation.

01 Laser Cutting

6 kW CNC laser cutting for steel, stainless steel and aluminium.

02 Sheet Metal Bending

Precision sheet bending with industrial press-brake equipment.

03 Tube & Profile Processing

Cutting, bending, rolling, end notching and preparation.

04 TIG / MIG / MAG Welding

Welding across stainless steel, carbon steel and aluminium.

05 Grinding & Polishing

Surface preparation and premium finishing for visible components.

06 Painting & Coating

Liquid painting, powder coating and sandblasting.

07 Engineering

Development from client drawings or full in-house technical design.

08 Installation

International on-site and on-board assembly by project teams.

Industrial capability in-house

Dedicated machinery supports flexible production for marine and custom fabrication packages.

6 kW CNC Laser

TRUMPF TruBend 5130

AMADA GPX 630

Welding Systems

Built for cruise-ship environments

Custom metalwork for passenger, exterior, hospitality, pool, wellness and service areas.

Luxury stairs & railings

Pool & wellness

Metal structures

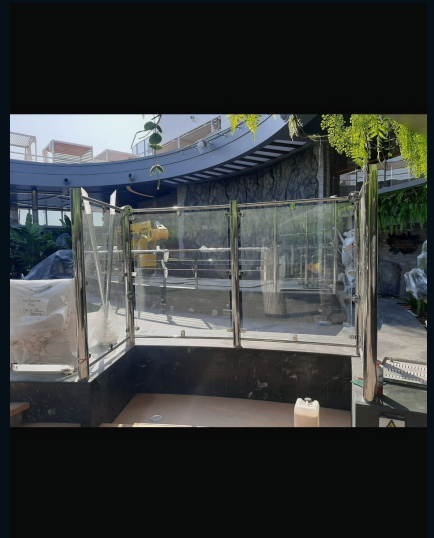

• Typical products

Passenger stairs, premium interior stairs, railings, balcony systems, jacuzzi structures, showers, pool ladders, bars, benches, sun loungers, waste units and decorative elements.

SELECTED WORK

Real project imagery

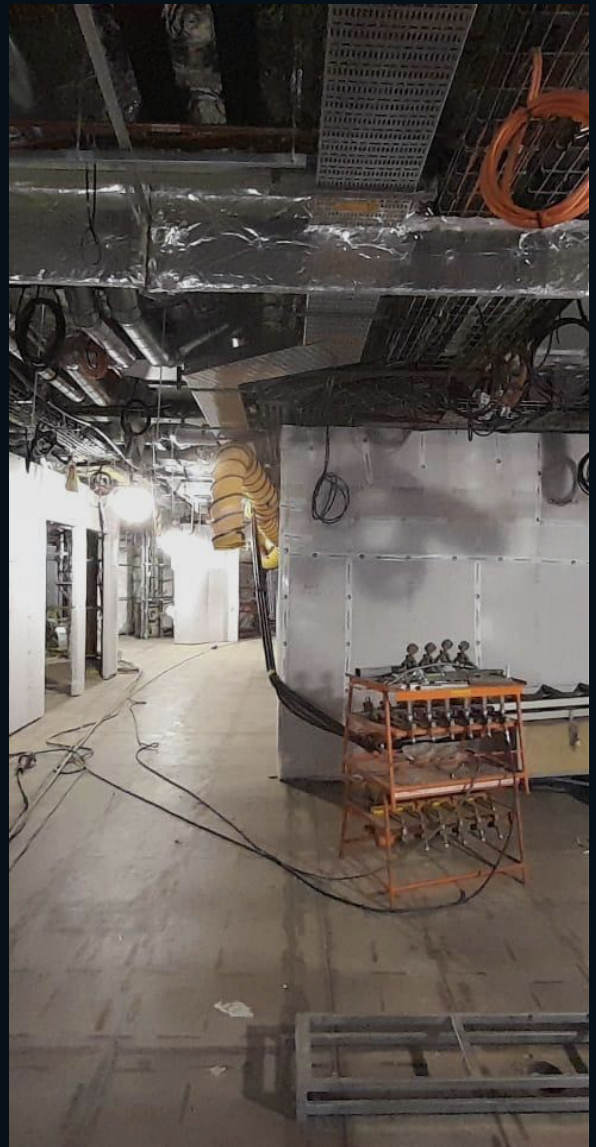

Representative photographs from fabrication, installation and completed marine work.

One continuous project workflow

A single production partner from technical development to on-board integration.

- 01 Engineering
- 02 Material preparation
- 03 Production
- 04 Finishing
- 05 Preassembly & check
- 06 Packing
- 07 International transport
- 08 On-board installation

From concept to controlled delivery

Practical internal project verification without unsupported certification claims.

- **Engineering review**

Client drawings, project requirements and manufacturability review.

- **Dimensional verification**

Key dimensions and interfaces checked against project documentation.

- **Weld & fabrication review**

Visual and fabrication checks appropriate to the project scope.

- **Surface & finishing review**

Visible surfaces, polishing and coating reviewed before delivery.

- **Preassembly when required**

Assemblies checked before packing where project geometry requires it.

- **Delivery preparation**

Packing and logistics preparation aligned with international delivery and installation.

Production in Romania. Project execution inte

Experience across European shipbuilding markets and the United States.
